

MODULAR BATTERY PACKAGEABSTRACT

A package for batteries comprising at least two separate modules and a cover placed over the at least two separate modules. Each module includes a base having a first face and a second face, with each module further including at least one pocket extending outwardly from the first face. Each pocket is configured and sized to accept a battery therein. Two of the at least two separate modules have the first faces thereof facing each other, with at least one pocket of a first one of the two of the at least two separate modules being located between a pair of pockets of a second one of the two of the at least two separate modules. The at least two separate modules are easily separated upon removal of the cover from over the at least two separate modules.
